# Anmol Panchal

289-654-7861 | github.com/anmolp476 | linkedin.com/in/panchal2003 | anmolp476@gmail.com

## Technical skills

**Languages**: Python, C, C++, Java, TypeScript, JavaScript, HTML5, CSS3
**Frameworks**: React.js, Next.js, Node.js, Express.js, TailwindCSS, ASP.NET MVC, JUnit, Pygame
**Libraries/Tools**: Git, Bitbucket, GitHub Actions, Confluence, Docker, Perforce (Helix Swarm), Jira

## Education

**Toronto Metropolitan University** **Sep 2021 – Apr 2026**
*Bachelor of Engineering in Computer Engineering - Software Discipline* *Toronto, ON*

- Relevant Coursework: Database Systems, Software Systems, Software Design and Architecture, Object Oriented Analysis and Design

## Experience

**Software Developer Intern** | *Java, JUnit, Helix Swarm, Confluence, Jira* **May 2024 – August 2025**
*Environment and Climate Change Canada* *North York, ON*

- Developed and maintained features in a **Java**-based meteorological forecasting system, completing 25+ **JIRA** tickets that improved forecasters' ability to monitor severe weather and issue timely alerts across Canada.
- Facilitated daily standups, sprint planning, retros for a cross-functional team of 6 developers and 5 QA/management staff, ensuring smooth sprint execution and effective prioritization of high-impact stories.
- Improved code quality and team velocity by contributing up to 40+ **JUnit** test cases, documenting solutions in **Confluence**, and performing more than 30 code reviews via **Helix Swarm**, helping reduce regression issues and streamline QA.

**STEM Instructor** | *Pygame, C, VEXcode* **July 2023 – May 2024**
*Exceed Robotics* *Mississauga, ON*

- Effectively taught game development using **Pygame**, enhancing their programming skills and creativity, resulting in a 25% increase in the number of completed game projects
- Led VEX Robotics sessions using **VEXcode** and **C**, coaching students to construct and program functional robots, leading to a 30% improvement in team competition scores

**Software Developer Intern** | *ASP.NET MVC, Bitbucket, Confluence* **April 2023 – August 2023**
*Eclipse Creations* *Remote*

- Optimized the company website using **ASP.NET MVC**, resulting in a 15% reduction in page load times, improving user experience and engagement
- Executed Scrum methodology within the team, leading to a 13% increase in project delivery efficiency, enhancing project management and completion of milestones
- Maintained comprehensive user manuals and documentation using **Confluence**, resulting in a reduction in troubleshooting time, enabling smoother issue resolution

## Projects

**Job Finder Automation** | *React.js, TailwindCSS, Docker, Python, GitHub Actions, SerpApi*

- Designed and built an automated job finder system that scrapes Google Jobs via **SerpApi**, applies filtering, and generates clean weekly reports, reducing manual job search effort by 60%+
- Implemented a CI/CD pipeline using **GitHub Actions** and **Docker** to run scheduled searches, and automatically publish results as GitHub Issues and build artifacts
- Developed a responsive **React.js** and **TailwindCSS** web interface to visually demonstrate the system's workflow and outputs, and deployed via **GitHub Pages**
